

A unique course for students, teachers and mentors that help primary students hit their 'level 5s' and shift secondary grades from Ds to Cs alongside ensuring A* pupils achieve their potential.

LEARNWISE

ORGANISATION ISN'T EVERYTHING IN LEARNING. BUT IT IS BASIC. THIS COURSE TEACHES HOW TO DO IT SIMPLY.

What students will cover

Students discover exactly how to:

- Generate and organise ideas
- Plan, redraft and write coursework efficiently
- Take notes and check for meaning and understanding
- Demonstrate their understanding with confidence when speaking and writing
- Assess their own learning and that of their peers
- Check they are revising the appropriate content for exams
- Revise and check for understanding on their own and with others
- Use a 3 step process that virtually guarantees total recall in tests and exams
- Plan and write exam answers that are well structured
- Use independent and cooperative learning skills that can be applied in school and at home

How you'll benefit

You'll gain:

- Strategies to further develop assessment for learning, direct interactive teaching and cooperative learning in classrooms
- The ability ensure that their students apply their new learning habits
- Methods to make meetings with students, colleagues and parents more effective
- Proven teaching and learning strategies to support colleagues

Why Graphic Organisers?

Graphic Organisers, not surprisingly, organise ideas and facts... graphically. And over thirty five years of research into what works best in classrooms to raise achievement has identified them as the top-ranking strategy. This warrants our serious attention.

How is the course delivered?

This course needs thoughtful preparation to maximise its impact. Download the accompanying LearnWise Preparation from the Model Learning website on the LearnWise page. It describes, step-by-step how to include teachers and mentors for maximum effect.
